UNITED STATES PATENT AND TRADEMARK OFFICE

Commissioner for Patents

In the past 18 months, the USPTO has undergone a major transformation with far-reaching benefits for both the applicants and the Office. The Office has moved from the paper processing of patent applications to working electronically with applications using the Image File Wrapper (IFW) system. This transformation has seen the conversion of 650,000 applications into this new system – more than 80 million pages. Applicants can now view their complete file using the Private PAIR system at any time, and all can view published applications as well.

During this conversion process, we have identified a small number of paper application files that we cannot locate and need your assistance to reconstruct. Attached is the notice under 37 CFR 1.251 that details the requirements for reconstruction. I am requesting your assistance in order to complete the conversion of all pending files into the IFW system. If you have any questions, please contact Dan Hunter, at (571) 272-8800.
